

Country	European Executive
Name	European Executive
Proposal	<p>To amend the European By-law point 6.11.1 by replacing it with a new version which will clarify the age classification in each rig:</p> <p><i>"In the calendar year of the Championship, competitors shall be: Aged from 35 - 44 to enter the Apprentice Laser Standard or Laser Radial Rig Categories Aged from 45 - 54 to enter the Masters Laser Standard or Laser Radial Rig Categories Aged from 55 or older to enter the Grand Masters Laser Standard Category Aged from 55 - 64 to enter the Grand Master Laser Radial Category Aged from 65 or older to enter the Great Grand Masters Laser Radial Category Aged 35 or above to compete in the Women's Laser Radial Masters"</i></p>
Current Situation	<p>Currently the European By-law point 6.11.1 does not clarify age requirements in each rig. Point 6.11.1 presently states:</p> <p><i>"In the calendar year of the Championship, competitors shall be: Aged from 35 to 44 to compete in the Apprentice Masters Aged from 45 to 54 to compete in the Masters Aged from 55 to 64 to compete in the Grand Masters Aged 65 or above to compete in the Great Grand Masters Aged 35 or above to compete in the Women's Laser Radial Masters"</i></p>
Reason for Proposal	<p>To bring the European By-law inline with actual practice. This proposal has been in practice and successful at the World Masters Championships for at least the past 5 years and it would make sense for it to be the same at the European Masters Championships.</p>
