

Country	Netherlands (NED)
Name	Karel van Asselt, NED
Proposal	Appoint a committee with the assignment to screen and revise the ILCA Requirements for the Organisation of a European Laser 4.7 Youth Championship and draft proposals for changes to be decided on during the 2012 EAGM, or so much faster as possible for the organisation of the EC in 2012.
Current Situation	The above mentioned Requirements involve a great number of obligatory details for the organisation of a European Laser Youth Championship. These requirements involve a heavy financial impact on the organisation, while the necessity and/or fairness are not evident. (see the Report from the Dutch organising organisation about the EC in Workum, 2011, which report is an integral part of this proposal) There are no regulations about the number of participants, so this is a free choice of the organising organisation and basic for the financial budget. There are on the contrary no clear regulations about a code of conduct between ILCA and the Organising authority.
Reason for Proposal	The organisation of the EC Laser 4.7 in 2011 in The Netherlands brought to light a number of obligations that at least need reconsideration. The costs of the organisation of such an event are out of proportion, certainly within the given maximum entry fee, the ad hoc decisionmaking of the maximum number of participants and the disproportionate withholding of entry fees by the ILCA office. ILCA should at least accept all costs of the members of the Jury, measurer and ILCA representative(s).ILCA should only have contact with the contract party and withhold from contacting other people from third parties. The committee should screen the requirements, taking into account the proposal nr.. about art 6.3 of the European By-Law brought in by NED and SUI and the suggestions in the paper from the Dutch organisation in 2011.(see attachement)
